

Experiment 10:

Experiment 10:-

Aim:- To create a cloning of a VM and Test it by loading the previous version/cloned VM

Requirements :- VMware Workstation

Procedures:-

- ① Install VM workstation
- ② Start to create a new virtualization machine.
- ③ configure the settings, assign the required memory & processors
- ④ Then, after creating it, by this previous version/cloned VM.
- ⑤ we have to clone the VM to start cloning
- ⑥ For cloning the system should be off mode
- ⑦ It will take a while & clone the whole VM exactly.

Result:-

creating a clone VM is successful
by using vmware software.

Name:- shauhd cloned

Guest OS:- Windows 7 (64-bit)

RAM:- 2GB

Storage:- 2GB

processor:- 2.
