

## Experiment 1:

### Experiment 1:-

Aim:- To create a simple cloud software application and provide it as a service using any cloud service provider.

### Requirements:-

\* zoho / Azure / Salesforce.

### procedures:-

- ① register for zoho using Gmail
- ② Then, Access the creator option
- ③ we have to enter the name for the application
- ④ The Application name is given as compiler
- ⑤ Then, we have to open form builder
- ⑥ Then we have to drag the options needed from the fields.
- ⑦ we have to take the URL field to complete this process
- ⑧ Access the form & fill the URL's with the compiler links.
- ⑨ The user's can access through by clicking the URL links
- ⑩ The URL links takes to the respective website.

## Result:-

We have achieved the process using  
zoho.
